quattrot

four reasons to change

state of the art technology, brilliant performances

4T is for those who love to stand out, work with modern, innovative and functional equipment. Each product is designed with attention to ergonomics and using the newest technologies in order to improve performances.

sensational looks, style is not a luxury

Attention to detail is important. Style and forms communicate the quality of your work and your organization. In 4T technology and design come together in a perfect balance creating a new style applied to professional cleaning.

tailored innovation

Our vast experience and technical expertise are at your service. We are a young company, yet we rely on craftsmanship and expertise which account for the fortune of the Made in Italy brand and satisfaction of its customers.

to each his own

In a world where everybody sell solutions, we offer you purely tools. We are focused on developing and manufacturing innovative products using the best materials: virgin grade PP for structural parts, POM for the moving parts, loaded plastics for components that undergo mechanical stress.

○○○ prexa
QUICK AND EASY WRINGING

Better ergonomics, less stress, performing mechanical lever enhanced by an exclusive gear system and technopolymers components

Effective wringing, for a dryer floor thanks to soft rubber inserts in the press bars. It works with all kind of mops

Great endurance: Polymers doped with glass fiber, evolved technical design, product production strictly made in Italy. Qualities that make Prexa a champion of endurance.

PREXA, down press wringer can be mounted on on all 4T buckets and trolleys and is compatible with similar products of the major players on the market. Prexa comes in two versions:

Prexa I – POM pressure bars with rubber inserts

Prexa S – POM pressure bars without rubber inserts

PREXA on Duetto

○○○ giotto
PERFECT MOVEMENT

Maneuverability and low noise on the move: "SilentWheel" is the newly designed wheel made of bi-component polymer. Diameter 80mm. Made in Italy, designed and built by 4T

Exceptional strength: innovative design of the frame; we select only the best virgin plastic, not recycled, to access to the full strength and durability of the material

Better ease of cleaning and hygiene: all surfaces are treated with Easy&Clean coating that grants less adhesion to dirt and liquids thus facilitating maintenances

GIOTTO 50 lt or 30 lt, comes with Prexa, available in different configurations

GIOTTO 30 / 50 LT, 2 buckets, with push handle

GIOTTO 15 / 25LT, 1 bucket, with bag support and tray

○○○ duetto
SUPERIOR INTERPRETATION

Superior performances: with a total capacity of 40 LT it's the biggest in its league. With wringer in place, still has 15lt real capacity for waste water. The size further facilitate the correct washing cycle in 3 phases: 1) impregnation in detergent solution and wringing 2) Washing 3) rinsing and wringing

QuickOut double valve vat drainage system grants a fast waste disposal

Better ease of cleaning and hygiene: all surfaces are treated with **Easy&Clean**, coating that grants less adhesion to dirt and liquids thus facilitating maintenances

DUETTO double vat 16 + 24 LT with Prexa, available in 4 configurations, with or without push handle and drain plugs

DUETTO without push handle

DUETTO with push handle

STURDY AND RESISTANT

Manouverability and low noise on the move: "SilentWheel" is the newly designed wheel made of bi-component polymer. ø 80mm, made in Italy, designed and built by 4T.

Safety and ease of use
The raised edge of the base of the frame allows buckets to remain firmly in position even when the wringer is not in place.

Better hygiene:
15LT and 25LT buckets are treated with **Easy&Clean**, coating that grants less adhesion to dirt and liquids thus facilitating maintenance

ARIETE with chrome steel frame or painted steel frame. One bucket 15LT or 25 LT, two buckets 30LT or 50LT total capacity. Prexa downpress wringer standard on all models

○○○ ambo
nemo
SUPERIOR DETAILS

Better hygiene : The surfaces of the buckets are coated in the Clean & Easy mode for a better cleanability. The dirt screen on the bottom of the bucket helps keeping the water clean optimizing cleaning results and hygiene

Funnel wringer for minimops raised and reinforced
Rigid and resistant thanks to a special polymer, makes wringing more effective. The raised position with respect to the dry edge maximizes effective capacity

Double vat bucket: Total capacity of 15lt. More clean water for greater operational autonomy

MINIMOP The 4T minimop system comprises an essential but comprehensive set of minimop replacements. Minimop suitable for use with Nemo and Ambo for fast and effective cleaning of small areas

Micro Strips
First grade microfiber, better performance, suitable for every use

Tex Plus
Ideal for smooth floors, it helps drying quickly after use

Micro Mix
Mix microfiber / cotton yarn. Indicated for porous surfaces

Cotton Mop
For every type of floor, high strength, high absorbency

Innovative materials:
Increased rigidity and resistance. Alluminum poles innovative manufacture process yields an increased rigidity while reducing weight. Less weight and better ergonomics, easily reaches up to 16 mt height

Innovative locking connectors.
Anti-rotation system improves control over the tool while working at high rises. No-crushing system increases hands safety when poles are quickly closed . Better efficiency and safety

Safe connection technology: all tools are locked to the safety connection cone to prevent accidental falls while working at high rises. Better safety .

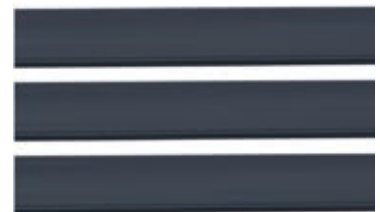

The **4T WINDOW CLEANING LINE** is developed in partnership with LEWI PROFESSIONAL WINDOW CLEANING TOOLS, German leading firm in this field. It includes highly professional tools of the greatest quality and effectiveness, very well known and appreciated by all window cleaning specialists around the world.

BIONIC bi-components ergonomic handle, better grip in all situations.

Window squeegee supports, adjustable, all borders are rounded to prevent any accidental injury or scratch

Window squeegee rubbers, universal natural vulcanized rubber. Best cleaning efficiency and resistance.

CODE	DESCRIPTION	PCS
------	-------------	-----

	Squeegee BIONIC made of stainless steel and bi-component ergonomic handle	
V10510	25 cm	10
V10511	35 cm	10
V10512	45 cm	10
V10512	55 cm	10

V10534	Bi-component ergonomic handle , better grip, improved comfort and safety of use	20
---------------	---	----

	Squeegee CLASSIC made of stainless steel,comes with rubber grip	
V10520	25 cm	10
V10521	35 cm	10
V10522	45 cm	10
V10523	55 cm	10

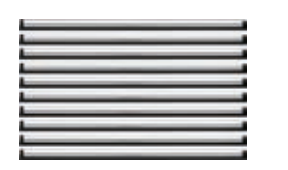

V10535	Handle CLASSIC non-slip rubber grip, safety hole prevents accidental falls when mounted on poles	20
---------------	--	----

	BIONIC DUO Washing and squeegeeing all in one , safety hole prevents accidental falls when mounted on poles	
V10501	35 cm	10
V10502	45 cm	10

	Rubber blade Vulcanized rubber , medium hardness (shore 53°) universal use, high efficiency and resistance	
V11020	25 cm	10
V11022	35 cm	10
V11024	45 cm	10
V11025	55 cm	10
V11026	92 cm	10

	Channels , stainless steel, no-scratch design, adjustable position, rubber included	
V11006	25 cm	25
V11007	35 cm	25
V11008	45 cm	25
V11009	55 cm	25

	T bar for washers, alluminium bar, plastic handle with safety hole prevents accidental falls when mounted on poles	
V10038	25 cm	10

our numbers

100%
made in Italy

thousands are the companies that work within the plastic district where 4T was born. 4T operates with the technology, the passion, the expertise and network resources of one of the most important Italian industrial districts.

100%
first choice

100% virgin grade plastic. Thirty years of experience in product development and plastics molding have taught us how to ensure the mechanical strength and chemical wear resistance appropriate for professional use. We employ: quality polypropylene for buckets and tools, POM for moving parts and gears, fiberglass loaded polymers for parts subjected to greater effort.

0 km
100% ecological

4T minimizes the ecological impact of the product life cycle. From design to production, from transport to use, to disposal and recycling. Our starting point are the suppliers close to our production site, in order to reduce pollution derived from transport.

quattrotec

materials and technology

In addition to excellence in design and engineering, the quality of the materials makes the difference in determining reliability and durability.

Following are the main materials we use in our plastic molding production process

Polypropylene Copolymer

It's the material of which are made all the buckets, the surfaces of the Giotto trolley, Duetto body and that of Prexa. PP copolymer is a thermoplastic elastomer with better mechanical characteristics than the more commonly used Polypropylene monomer.

The PP copolymer is more resistant, melts at a higher temperature, moreover possesses high resistance to chemical agents: it retains its strength characteristics in the presence of aqueous solutions containing salts, acids and strong alkalis. We use only non-recycled PP with great flexibility and strength that provides excellent shock-proof performance at high and low temperatures.

POM Acetal Resin

POM is a semi-crystalline copolymer of great mechanical characteristics. It is characterized by a series of properties that place it as an alternative solution to replace some metals such as steel, brass, aluminum in many mechanical components. Null water absorption, great dimensional precision and mechanical stability call for its use whenever strength and tight tolerances are required.

With the selection of first choice POM, 4T maximizes hardness, stability and the wear resistance. Gears and jaws Prexa, all coupling systems and levers and moving parts of tools, Plano as well as Flight and mop clamp are made of POM

Composite plastics

Our strong expertise and experience in engineering plastics technology applied to cleaning allows us to develop special composite materials when is needed. It is the case with the torque shaft of Prexa loaded with fiberglass which maximize mechanical chemical and wear resistance; Another example is the structure of Plano, for which a particular formulation of ABS that emphasizes the characteristics of lightness, stiffness and impact resistance, was developed.

All items manufactured and sold by 4T Italia srl satisfy all safety requirements and are suitable for professional use. Product data, weights, descriptions and images included in this catalog are to be considered indicative. 4T Italia srl, aiming to a continuous product improvement, reserves the right to modify product features and catalog contents at any time and without any notice.

All images, pictures, drawing and logos and any other representation of 4T products and 4T logos or brands, belong exclusively to 4T Italia srl and, therefore, can not be used in any form or in any way by anyone without an expressed written authorization by 4T Italia srl.
